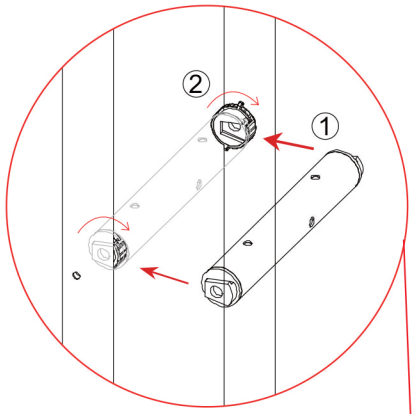
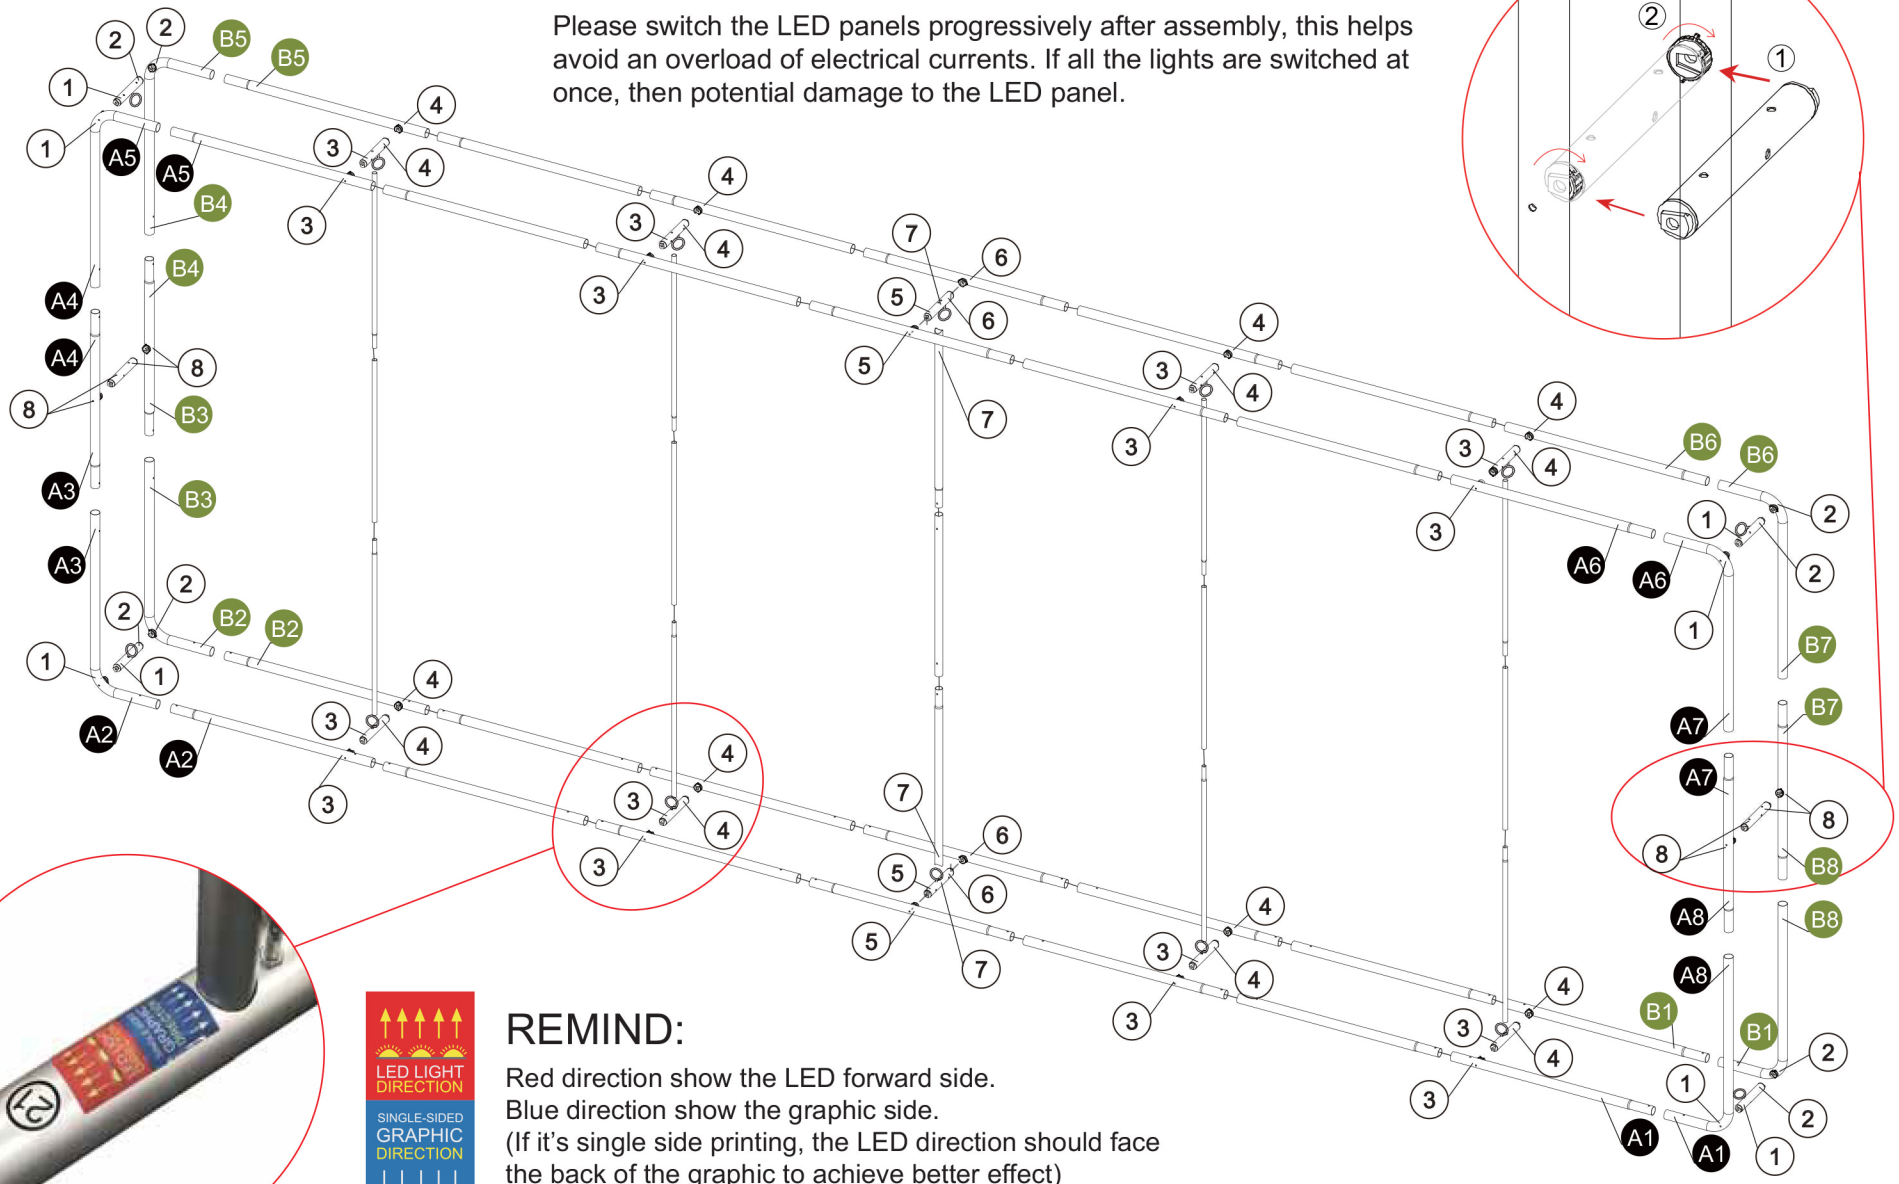
INSTALLATION INSTRUCTIONS

20FT Large Portable Light Box

Attention:

Please switch the LED panels progressively after assembly, this helps avoid an overload of electrical currents. If all the lights are switched at once, then potential damage to the LED panel.





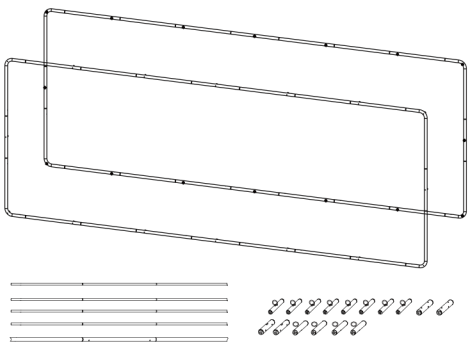
REMIND:

Red direction show the LED forward side.
Blue direction show the graphic side.
(If it's single side printing, the LED direction should face the back of the graphic to achieve better effect)

INSTALLATION INSTRUCTIONS

20FT Large Portable Light Box

1



Put both horizontal tube connect with same label in to a frame, as the picture shown, and prepared the middle tube

2
